And website was dead
Responsibility	<ul style="list-style-type: none">Read source code and understand the workflow.Deploy to another AWS account.Document all the steps and technologies
Technologies Used	<ul style="list-style-type: none">ReactJSNodeJSMongoDBAWS App RunnerAWS AmplifyAWS Route53

PROFESSIONAL EXPERIENCE

Software Developer at Jung Talents

June 2020 - Present

- **Company Website:** <https://jungtalents.com>
- Supported team leader for application documentation on business logic and new feature planning.
- Successfully migrated database on-premises to cloud and applied archive database solution on document search to optimize the search feature for PTE Master project.
- Deployed application and published PTE in AWS Amplify for front-end automation deployment and build CI/CD YML connected with GitHub using CircleCI for automation of the process in EC2.
- Developed a new feature on automatic student correct and performance analytics to suggest different strategies and skills for users using Typescript and NestJS.
